Not only is the dog a part of the family, they are like a trial run for kids.
So we started looking at pet furniture needs.
In the wild, dogs share food together, play together, sleep together.

The HUNDSTOL dog Highchair simulates what naturally occurs in the wild resulting in a balance and a happier animal.

This is a large chair. It supports dogs up to 35 kilos.
Dog comfort is paramount, so there is a hole in the back of the chair for the tail, and a grip on the sit of the chair for stability.

No one really wants dog food and water bowl at the table, so we designed two insert bowls that are easily removed for washing.

The HUNDSTOL Dog Highchair from Ikea completes the gap dog lovers have always known: the dog is a part of the family!
